Finally, Wall Street simplified!

Household fly Frederick Flyberg and his pal Leonard have always been best friends – from a snow cone stand on Main Street to a Wall Street brokerage house today. So come along with them to the world of stocks and shares and bulls and bears, and learn about investing. You will find out why Wall Street is actually a part of Main Street!

A Fly on the Wall Street is the perfect beginner's book for understanding the workings of the complex financial industry. Aimed at young readers – as well as teenagers and adults who want to learn the basics – this book is filled with key terms and concepts of the stock market.

"This is the best 'child-friendly' book about investing that I have ever read! ...a much-needed solution to the educational void in personal finance for younger Americans."

~ Robert D. Chappell, Senior Vice-President – Wealth Management Advisor, Bank of America Merrill Lynch, The Woodlands, Texas (Recognized as one of Barron's top 1,000 financial advisors in 2012)

"Every family could benefit from the simple explanations and examples used in these pages to describe the stock market. In our day and age, this is a must read for teachers and students in our country."

~ Paul Johnson, Superintendent of Mill Valley School District, Mill Valley, California

"What a great way for children (of all ages) to understand the stock market and encourage them to set financial goals!"

~ Leslie Roper Day, CFP® – Radio Talk Show Host, Sacramento, California

"This book will not only be great reading for the younger set but also for many of their parents. I hope to share it down the road with my grandchildren."

~ Stephen A. Winslow, Senior Vice President - Financial Advisor, Morgan Stanley (Retired), Seattle, Washington
